NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

summary: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

- 1. Type of submission, new, revision, or extension: Extension.
- 2. The title of the information collection: Exercise of Discretion for an Operating Facility, NRC Enforcement Policy (NUREG-1600).
- 3. The form number if applicable: Not applicable.
- 4. How often the collection is required: On occasion.
- 5. Who will be required or asked to report: Nuclear power reactor licensees and gaseous diffusion plant certificate holders.
- 6. An estimate of the number of responses: 38 annually.
- 7. The estimated number of annual respondents: 38.
- 8. An estimate of the total number of hours needed annually to complete the requirement or request: 2,280.
- 9. An indication of whether section 3507(d), Pub. L. 104–13 applies: Not applicable.

10. Abstract: The NRC's revised Enforcement Policy includes the circumstances in which the NRC may exercise enforcement discretion. This enforcement discretion is designated as a Notice of Enforcement Discretion (NOED) and relates to circumstances which may arise where a nuclear power plant licensee's compliance with a Technical Specification Limiting Condition for Operation or with other license conditions would involve an unnecessary plant transient or performance of testing, inspection, or system realignment that is inappropriate for the specific plant conditions, or unnecessary delays in plant startup without a corresponding health and safety benefit. Similarly, for a gaseous diffusion plant, circumstances may arise where compliance with a Technical Safety Requirement or other certificate condition would unnecessarily call for a total plant shutdown, or, notwithstanding that a safety, safeguards or security feature was degraded or inoperable, compliance would unnecessarily place the plant in a transient or condition where those features could be required.

A licensee or certificate holder seeking the issuance of a NOED must provide a written justification, which documents the safety basis for the request and provides whatever other information the NRC staff deems necessary to decide whether or not to exercise discretion.
